STid, a French developer of RFID door controllers to its growing ecosystem of supported access control partners. Through this agreement, the STid Architect® series of ergonomic and highly secure RFID readers, which is supported by the Genetec Synergis™ access control system in Genetec Security Center-will be available through Genetec and its certified global network of resellers.

Thanks to the Genetec open-architecture strategy, Synergis end-users now have even more choice for their access control management with the addition of the STid Architect series of ergonomic and highly secure RFID readers. By easing complex ordering processes and reader configurations, Genetec customers can choose the modular, vandal-proof, and highly configurable access control hardware from STid-with a simplified ordering, installation and maintenance process. **More**

CACI wins $48M Army contract to support CIO/G-6 Directorate

CACI International Inc (NYSE: CACI) announced today that it has been awarded a $48 million prime contract to provide information technology (IT) support services for the Army Architecture, Operations, Networks, and Space (AONS) Directorate of the U.S. Army Chief Information Officer (CIO)/G-6 that will maximize mission performance via innovation, transparency, and greater efficiencies. The five-year award represents new work in the company's Enterprise IT market area.

Mengucci

The U.S. Army CIO/G-6 leads Army network modernization to deliver timely, trusted, and shared information for the Army and its mission partners. Under the AONS contract, CACI will provide technical services supporting the CIO/G-6 in planning, program, budget, and analytical services to aid in resourcing critical Army command, control, communications, computers (C4) and IT needs. CACI will also provide recommendations for how the CIO/G-6 can synchronize technology and business management to enable better execution, risk control, and efficiencies for the Army. **More**

Chicago considers ordinance requiring panic buttons for hotel staff

BROOKFIELD, WI April 28, 2017 RF Technologies (RFT) HELP ALERT® Panic Alert System for Hospitality was recently featured in a news story (WLS-TV, Chicago) highlighting the need to protect hospitality workers from violence and assault in the workplace. The story outlined an ordinance introduced on April 19, now under consideration by the Chicago City Council, which would require that certain staff in Chicago hotels be equipped with panic alert devices to protect them while they work. RFT's Marina Willis, president, Pinpoint Technologies, was interviewed for the story.

According to a Chicago Tribune report, the bill, sponsored by Alderman Michele Harris, 8th Ward, and backed by labor unions including Unite Here Local 1, would require that employees working alone in Chicago hotels be issued panic buttons (such as RFT's HELP ALERT wireless pendant) that would enable them to warn security quickly if they encounter potentially dangerous situations in guests' rooms. The ordinance would also require that hotels post sexual harassment and assault policies and promise no retaliation against workers who report encountering such treatment. Hotels that do not provide the panic alert buttons and adhere to other parts of the measure could be fined up to $500 per incident. **More**

LRAD receives $1.6M order from Eurasian oil company for a second mass notification system

LRAD Corporation (NASDAQ: LRAD), the world's leading provider of acoustic hailing devices and advanced mass notification systems, today announced a second LRAD 360XT systems order from one of the largest oil and gas companies in Eurasia.

Danforth

The LRAD ONE VOICE mobile mass notification systems in the $1.6 million order will have LRAD's solar power option and be integrated with a gas detection alarm system. Equipped with LRAD 360X emitters, each system provides a 1,000-meter radius of communication coverage, and will be used for public address,

emergency communication and early warning. The order is scheduled to ship during calendar 2017. **More**

Kansas become first statewide deployment site of AT&T NextGen 911 solution

TOPEKA, KS, April 27, 2017 AT&T and the Kansas 9-1-1 Coordinating Council continue to improve the 9-1-1 experience in the state. Kansas will be the first statewide deployment of AT&T ESInet™.

AT&T ESInet is a new NextGen 9-1-1 solution that provides IP-based call routing services to emergency response centers. It will help Kansas boost 9-1-1 reliability, speed emergency responsiveness and improve disaster recovery. For Kansans, this means a faster, more reliable 9-1-1 experience. **More**
